# Mahesh Uppala

*IT Engineering student*

uppalamahesh777@gmail.com 09985186162 Cha cha nehru nagar

## SUMMARY

**Third-year Information Technology student at Vasavi College of Engineering with hands-on experience in software development, full-stack development, and AI/ML. Skilled in C, Java, Python, and modern web technologies, with experience developing projects involving AI-based battery SOH prediction, community management, banking systems, blockchain simulation, and legal information. Strong foundation in data structures, databases, operating systems, and computer networks, with a focus on building practical and intelligent software solutions.**

## EDUCATION

**B.Tech in Information Technology** 09/2024 – Present
*Vasavi College of Engineering* Hyderabad,
CGPA: 8.1/10 Telangana, India
Currently pursuing 3rd year (Semester V).
Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Software Engineering, Artificial Intelligence & Machine Learning.

## SKILLS

**Programming Languages**
C, Java, Python, JavaScript

## CERTIFICATES

**The Joy of Computing using Python**
NPTEL | Score: 87%

**CCNA: Switching, Routing, and Wireless Essentials**
Cisco Networking Academy

**Junior Cybersecurity Analyst Career Path**
Cisco Networking Academy

## PROJECTS

**NyayAI**
*AI-Assisted Legal Information Platform*
- Designed an AI-based platform to make legal information more accessible to users.
- Integrated intelligent information processing with a user-friendly application interface.
- Focused on applying AI/ML concepts to a practical real-world problem.

**Battery State-of-Health Prediction**
*AI/ML-Based Battery Health Estimation*
- Developed an AI/ML approach for estimating battery State of Health (SOH).
- Worked with battery-related data, preprocessing, model training, and predictive analysis.
- Applied machine-learning techniques to a practical battery-health estimation problem.

**Banking Management System**
*Java-Based Application*
- Developed an application for managing common banking operations.
- Implemented application logic and structured data handling for banking workflows.
- Applied object-oriented programming and database concepts.

**Blockchain Simulator**
*Blockchain Concepts & Simulation*
- Developed a simulator demonstrating fundamental blockchain concepts.
- Implemented concepts including blocks, hashing, chaining, and transactions.
- Used the project to understand the underlying structure and operation of blockchain systems.

## INTERESTS

Artificial Intelligence & Software Development
